RE: No Further Action at Defense Finance and Accounting Service, 6760 E Irvington Place,  
Lowry AFB, Denver, Colorado

Dear Mr. Carlson:

The Solid Waste Unit has reviewed the August, 2000 Groundwater Monitoring Report. Although the hydrocarbon plume migrated under building 444, point of compliance wells located downgradient of the plume and Building 444 have not been impacted. Only one monitoring well, within the plume, had a detectable TPH concentration, and that was less than 10 ppm. Based on the reports which have been received, the threat of the plume migrating off-site is unlikely. Therefore, no further action is required for this site.

Please be advised that this letter does not relieve the property owner, or future owners, of potential liability or need for further action should problems arise from contamination remaining on the property.

If you have any questions, please contact me at (303)692-3417.

Sincerely,

Julie Cotter  
Solid Waste Unit  
Compliance Program
